deister electronic

proxSafe® *Intelligent Key Management and Smart Storage Solutions*

proxSafe solutions improve security, increase efficiency, and help you enforce policies on shared assets and keys. Gain complete control over assignments and transactions with our standalone solution or integrate with your Physical Access Control System to efficiently manage access through a single platform.

Our modular and scalable key and smart storage systems offer intelligent control, administration, and documentation of your transactions – flexibly and from anywhere. proxSafe creates the highest degree of efficiency and comfort in your everyday operations.

Maintenance Free keyTags

Thanks to RFID technology the keyTags attached to the keys operate contactless – this means inserting the tags in the slots does not result in any wear and tear.

Integrated Asset Charging

Ensure that the asset is ready for the next shift. Equipment can be charged while the item is stored in the cabinet. The state of charge is also displayed.

Local or Global

Our software is web-based so it supports administration across multiple locations. This means you are easily able to centrally monitor systems in different locations.

Emergency Operation Mode

All cabinets remain operational – even in the event there is a power or network failure. The data is stored locally and an integrated emergency battery secures continued operation.

Software

A variety of features and modules for diverse applications. All access is automatically documented and the information issued in user definable reports.

Cabinets

proxSafe Key Management and Smart Storage cabinets secure keys and assets. The modularly designed cabinets are available in a variety of sizes and the solution and are completely scalable. The cabinets are accessed through a variety of terminals. Users can be identified by ID card or PIN. The easy-to-use system guides you to your key or cabinet door with LED illumination. Key cabinets are available in maxx and flexx versions. maxx features an automatic role shutter door, and flexx is available with a solid steel or windowed door.

Terminals

We will help you select terminals based on your needs. In some applications a simple read a return is needed, other times a more detailed graphic display is useful for communicating key policies. Each terminal is equipped with an RFID reader to accept ID badges and read the deister keyTag to identify the key or item being returned.

keyTags

Our patented, contactless design is the most durable keyTag available and backed by a lifetime guarantee. keyTags are maintenance free, there is no battery to replace, and performs flawlessly in any environment.

Commander Connect Software

The Commander Connect software allows for easy administration. It supports proxSafe as a standalone solution, or it can integrate with an existing Physical Access Security Systems (AMAG Symmetry, C.Cure 9000, Genetec, and Lenel OnGuard).

Paladin — Authorized Value Added Reseller

PALADIN Ohio's Premier Systems Integrator

deister electronic Value Added Resellers provide comprehensive solutions, incorporating deister's innovative technologies into your overall security and asset management solutions. Whether you are looking to integrate your deister solution with an existing Physical Access Control System, or operate as a standalone system, Paladin can help you get the most from your investment.
