

Integrated solutions for educational environments

Intelligent, discreet and effective access management solutions

How do deister systems support the education industry?

deister offers a wide variety of solutions tailored to higher education

With a high-volume of people passing through education facilities daily, it can be difficult to keep a track of what happens.

From sports arenas to student housing, universities have the security concerns of a municipality and a 24/7 student population to protect. Efficiently managing and securing sensitive assets is critical to reducing risk and improving awareness.

Our integrated solutions help you increase security, simplify asset management, and reduce administrative burden.

- ✓ Enhance Security and Loss Prevention
- ✓ Secure and Convenient Access Control
- ✓ Increase Accountability and Awareness
- ✓ Track Asset Utilization
- ✓ Connect and coordinate multiple Systems in one Software for Synchronized Access Rights

Vehicle Access

Vehicle Access Control

Gate Control

Manage and automate vehicle access onto and within your campus with our vehicle identification systems. More reliable than traditional methods of vehicle identification, you can automate the process and remove the need for using staff to man your car parks. You can use this system for bus bays, car parks, barriers, gates and other long-range identification purposes.

- ✓ Tamper-Proof Windscreen Stickers
- ✓ Operates in all Weather Conditions
- ✓ Can be combined with other Systems such as Access Control

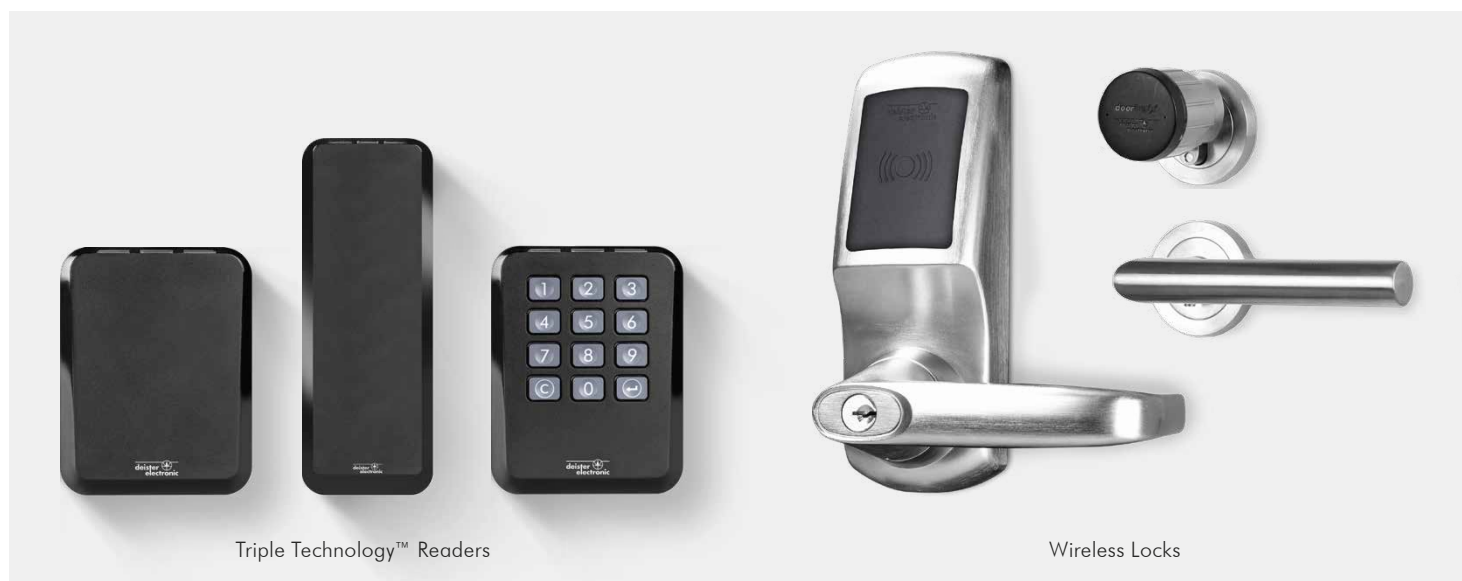

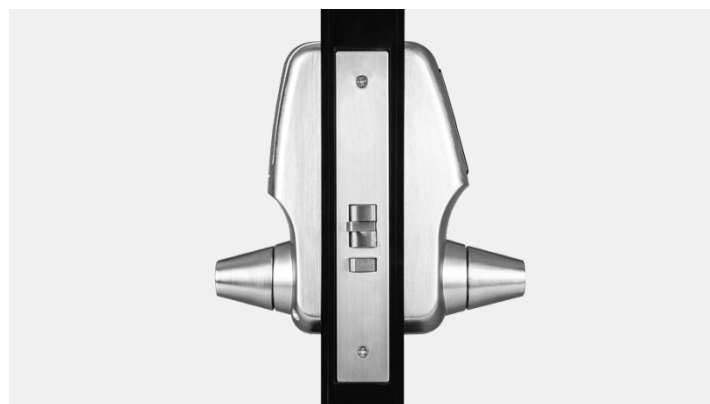

Access Control

Intelligent Locks and Readers

Increase security, replace conventional door locks with an electronic access control system. The software can be used to assign access authorizations to students, teachers and security personnel or to deactivate lost transponders with one simple click. Enhance your existing Physical Access Control with new Triple Technology™ Readers.

- ✓ Retrofit to any Door
- ✓ Real-Time Monitoring
- ✓ Secure Reading Technology

Triple Technology™ Readers

Wireless Locks

Key Management

Manage and Audit Key Usage

You are responsible for the safety of your students 24/7. One master key in the wrong hands can create significant liability and expose your students to theft or physical harm. Our proxSafe key management solution increases accountability, enables access policies, provides audit transaction history, and automates alerts on time limits and curfews.

- ✓ Enhance security and Loss Prevention
- ✓ Increase Accountability and Awareness
- ✓ Set curfews to prevent Master Keys from leaving Premises

Weapon and Asset Management

Electronic Locker Systems

Your departments are in possession of restricted specimens, valuable equipment, laptops, radios, hazardous chemicals or weapons. Securing these items with a proxSafe Smart Storage System can help your faculty manage availability, audit access, limit access, and provide unmatched asset security.

- ✓ Prevent Loss and Theft of Valuables
- ✓ Limit Access to Sensitive Items
- ✓ Easily Reserve and Manage Shared Devices

Proof of Visit / Guard Tour Systems

Control Campus Security and Maintenance

Ensure security and maintenance checks are being performed without requiring additional personnel. With our proof of visit system, you can set-up checkpoints around your site and simply require staff to take a collector on their round and present it to the checkpoints when they reach that area.

- ✓ Robust and reliable Data Collectors
- ✓ Auditable Records
- ✓ You can move Control Points at any Time

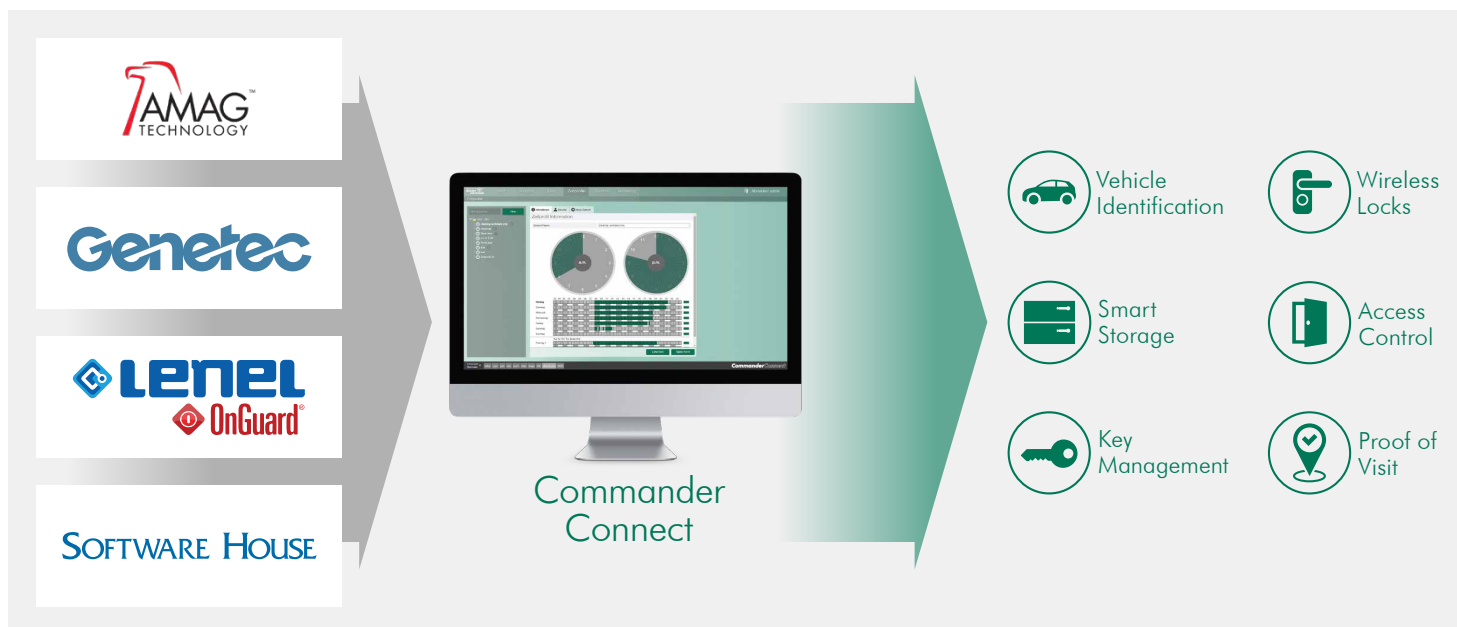

Commander Connect

One Software for all Systems

A powerful intuitive software platform allows easy administration of multiple deister systems. It provides a complete connected and modern system architecture. It integrates with a wide variety of Physical Access Control Systems including those listed below.

The deister commander software is completely web based with an

SQL back-end database. It operates stand-alone directly connected to one or multiple Deister systems and it can easily scale up to an enterprise level and will perform on either a single computer or a networked environment.

About deister electronic

deister electronic is an innovative, family owned global business with 40 years experience in developing electronic and mechanical products for security and industrial automation. Widely acclaimed for our expertise and specialist implementation of RFID technology within practical applications, from key management and access control to logistics and process control.
