

# doorLoxx - Electronic cabinet lock

Your individual cabinets or lockers go digital

## Digital cabinet lock DCL 3

Secure storage of valuables in cabinets or lockers - with the reliable and electronic cabinet and furniture lock from deister electronic. The elegant electronic lock with its timeless design does not require any cables, can be installed quickly and can be centrally managed with our Commander Connect software. Integration into a professional building and asset management software is possible at any time.

In addition to common reading technologies such as MIFARE® DESFire and LEGIC®, the lock also supports Bluetooth™, which means that it can be conveniently opened with a mobile phone. In addition, the patent-pending energy management system allows a battery life of up to 60,000 activations, which is twice as much as most other cabinet locks on the market.

So, if you are looking for a cabinet lock that can be used individually, is rugged and features unrivalled energy management, then look no further than the DCL 3 digital cabinet lock from deister electronic.

- ✓ All common reading technologies are supported and can be changed at any time
- ✓ Long battery life of up to 60,000 activations
- ✓ Available with various levers
- ✓ Elegant design, which fits into office furniture, cabinets and lockers
- ✓ Easy to install and dismantle
